CONDENSATION CROSS-LINKING POLYURETHANE MATERIALS
CONTAINING SPECIAL AMINOSILANES, A METHOD FOR THE
PRODUCTION THEREOF AND THEIR USE

Abstract

This invention relates to polyurethane compositions which cross-link via a silane polycondensation and contain at least one alkoxysilane-functional polyurethane, at least one basic filler, at least one reaction product of an aminosilane with a maleic or fumaric ester, at least one organometallic compound and optionally additional auxiliary substances, to a process for their preparation, and to their use.
